The Bosque de Chapultepec, with the Sección Chamula forest in the southwest corner, which covers a surface of about 6 hectares. The site is in an area with a great thermal capacity due to its altitude and great depth. del Bosque de Chapultepec. Colección del Museo Nacional de (ver documento multimedia). to a great number of species of vertebrate fauna. The zoo consists of a natural forest with all kinds of trees, regions and microclimates which simulate the elements found in the park and its surroundings (La Campana, Cam-pitas, Quintana Roo, Amealco). The zoo is also made up of a collection of large mammals of Mexican and tropical origin (llama, deer, peccary, armadillo, sloth) and large birds (swan, emu, parakeet, wild bird). The zoo is dedicated to the conservation of wildlife and plants, through the excellence of all aspects of zoology. The zoo is open from 09:00 to 17:00. The zoo is located off the I-10 access road that runs along the northern border of the city of Mexico City. The zoo is accessible on road number 665-S or by bus No. 664. It is located at km 1.1 of highway 1. Before the current construction, the Torre Bosque de Chapultepec was one of many suburbs that were built along the Paseo de la Reforma, and later with the construction of the Mexico-City highway. In the mid-twentieth century the presence of the Torre Bosque de Chapultepec became necessary, In 1951 the first proposals were made for the creation of the Bosque Chapultepec, consisting of a set of avenues and streets. In the mid-sixties, the idea was raised to build the Bosque del Chapultepec to be the largest and most beautiful park of the city of Mexico. Bosque de Chapultepec.pdf The Bosque de Chapultepec has since then been planned to have, as one of its main aspects, the transformation of an extensive area of the Mexico City into a huge park of wood, plants, and trees. This project has been approved by the Secretaria de Medio Ambiente (Secretariat of Environment) and has achieved, 2d92ce491b
