Windows 8 – Windows 8 is an upcoming version of Microsoft Windows, the most widely used operating system based on the Linux kernel and commonly known for being part of the Windows NT family. Windows 8 was first announced by Microsoft on May 29, 2010, the user interface of Windows 8, unlike previous versions of Windows, which are designed primarily for use with personal computers, Windows 8 is designed to support touch, pen and keyboard input. All three of these input methods are available at the same time, eliminating the previous need to switch between the three and re-learning how to use each device. Despite this user interface change, Windows 8 will still allow users to perform all current desktop operations, the interface also supports all the features of Windows 7, including support for the Aero graphical interface, Windows Media Center, Windows Search, and Windows Firewall. Windows 8 is designed to integrate closely with the Microsoft Surface RT and Surface Pro tablet devices, allowing them to use the same operating system and applications. According to Microsoft, Windows 8 was inspired by the design and interface of iOS and Android mobile OS, and was created by the same design team that created the mobile OS. The name Windows 8 is a combination of Windows and Windows NT 6. The Windows NT name was officially used for Windows operating systems until Windows NT 6.0, Windows 8 will continue the history of the Windows brand, which is currently used for the server versions of Windows NT, Windows 2000, Windows
