systemsQ: Why does
this C++ program

have a segfault? I'm
writing a method that

finds a small number
of words from a

sentence and I'm
having some

problems. The function `strtok` (I'm using it in `c++`) is segfaulting and I don't know why.

```
bool bad_words_reader::is_word_in_sentence(const char* sentence, const char* word) { char word_compare[256]; char* temp = strtok(word, " ");
```

```
while (temp!= NULL)
{
strcpy(word_compare,
sentence); word_com
pare[strlen(word_com
pare)] = '\0'; if
(strcmp(word,
word_compare) == 0)
{ return true; } else {
54b84cb42d
```
