KeepITupMac is an utility that will periodically scan and monitor your internal drives and replace bad sectors. The program will check every day and scan any mounted drives. The program will not run unattended and will require that you provide input as to what should be done when. KeepITupMac monitors your internal drive for bad sectors and replaces them as the user deems appropriate (in general, large files are rewritten or moved to a different drive). If a bad sector is detected, the user is presented with the option to replace the sector with an error free copy of the data or to skip the sector. The user is presented with a list of sectors that need replacement. If a bad sector is found on a partition, the partition will be reformatted if necessary. check disk is an extremely simple tool. It scans your hard drives and other mass storage devices for errors and attempts to repair them. There are multiple other solutions, but I find this one the simplest. To prove Theorem 2, note that in the special case when $X = \mathbb{R}^n$, we can write $V(X)$ as $|X|$, and then the expression in Theorem 2 is the same as the expression obtained in Theorem 1. For general \mathbb{Q} -vector spaces X and Y , take the diagonal algebraic torus $T := (\mathbb{C}^*)^n$, $n = \dim X \cdot \dim Y$, and let T act on $X \times Y$ via the action on the first coordinate. We have $V(X \times Y) = T \times V(X) \times V(Y)$. From Theorem 1, we conclude $|V(X \times Y)| = |V(X)| \cdot |V(Y)| \cdot \frac{|T|}{|T \cap T'|}$, and then
$$\begin{aligned} |V(X \times Y)| &= |V(X)| \cdot |V(Y)| \cdot \left(\frac{|T|}{|T \cap T'|} \right)^{1+\delta} \\ &= \left(\frac{|V(X)|}{|V(X) \cap \pi_X^{-1}(e_X)|} \right)^{1+\delta} \cdot \left(\frac{|V(Y)|}{|V(Y) \cap \pi_Y^{-1}(e_Y)|} \right)^{1+\delta} \\ &= \left(\frac{|V(X)|}{|V(X) \cap \pi_X^{-1}(e_X)|} \right)^{1+\delta} \cdot \left(\frac{|V(Y)|}{|V(Y) \cap \pi_Y^{-1}(e_Y)|} \right)^{1+\delta}, \end{aligned}$$
 as required. **Acknowledgements.** We would like to thank the referee for helpful comments. [99]
