For most Filipinos, shopping malls are a home away from home, with gardens and flowers inside and out. If we're lucky enough to live in a country that has both a tropical and a temperate climate, then flowers are blossoming everywhere. The clear weather is a blessing indeed. When the sun is shining and the sky is blue, we express our natural beauty through colors, shapes, and textures. These are the things that make any of our outfits look amazing, whether it's a simple dress or a casual sweater. Flowers are no different. If you're wearing a flower print dress, or maybe a wavy neckline, then your outfit

What's New in the AutoCAD?

Improvements to the standard Drawing View and drawing user interface: The standard Drawing View offers up to five new options, including the new "AutoHide" feature for automatically hiding parts of the Drawing View that are out of the user's way. AutoHide also enables you to quickly return to a file when needed. Now you can quickly restore the original view of your drawings by clicking and dragging a corner of the Drawing View, which returns the drawing to its original size and orientation. You can use the Drawing View's various other options, such as snap mode, magnification, and pan/zoom modes, to find what you need quicker. You can now click to select a drawing and switch between drawing views. Viewports in the Drawing View now have consistent color names. Now you can use "drag to open" to quickly open files in all drawing views. (video: 1:22 min.) Now you can drag an object from another drawing to the current drawing to use it.
